Certified Exhibition Data Report 2011

www.fkm.de

The FKM in 2011

In 2011, there was practically no change in the number of exhibitions certified by FKM. German organisers generally remain keen for auditing to be carried out on the exhibitor and visitor statistics of their exhibitions.

WNP Fachmessen GmbH, Munich, became new member of the Society for Voluntary Control of Fair and Exhibition Statistics (FKM). Photon Europe GmbH, Aachen, and Messe Lörrach are no longer members.

Currently 62 organisers in Germany are partners of FKM. In 2011, a total of 201 events in Germany were subject to certifying by FKM.

Two guest members from abroad, the Verona Trade Fair Company and the Hong Kong Trade Development Council, had a total of 16 exhibitions certified.

Essentially, every FKM certification takes basic data on exhibitors who have their own stands, exhibitors' stand space and visitor numbers into account, in each case differentiating data according to domestic and foreign origin.

FKM's evaluations of visitor patterns have become increasingly important to businesses exhibiting at exhibitions, as they make it possible to pinpoint the groups they can specifically target at these events. Standard analyses for trade visitors and the general public are available for more than three-quarter of the events certified. These provide information on visitors' regional origins, branches of industry, influence on decisions and the duration of their attendance.

For businesses exhibiting these analyses are an important instrument aiding preparations, and a means of monitoring success. Statistics on visitor patterns also provide criteria for selecting exhibitions over other marketing instruments.

Since 2012: certification instead of auditing

As of 2012 auditing by FKM is defined as certification, thereby underlining the role of FKM as a voluntary, customeroriented auditing organisation.

Accordingly, FKM has put together a communications concept which has been implemented since spring 2010. As of early 2012 all members are obliged to comply with the new set of rules, which were agreed in late 2009.

Comparability and reliability

The data collected in accordance with the statutes and rules of the FKM, are audited by a company of public accountants. As a result, the comparability of the registered events between each other and over a period of time is guaranteed.

Online Service

FKM has redesigned its website at www.fkm.de. It presents certified exhibitor and visitor statistics and the rules based upon which they have been obtained, offers tips for making use of data and has information on FKM's role as a provider of services for everyone involved with exhibitions.

The logo has been changed and in it, the green checkmark now gives certified, quality trade fair data the thumbs up!

International Exhibition Transparency

FKM and other European auditing companies jointly compiled the brochure entitled Euro Fair Statistics, which since 2010 has been published by the Global Association of the Exhibition Industry (UFI). This task was previously undertaken by FKM. 22 countries have taken part: Austria, Bulgaria, Croatia, Czech Republic, Finland, France, Germany, Hungary, Italy, Moldavia, Montegegro, Netherlands, Norway, Poland, Portugal, Romania, Russia, Slovakia, Spain, Sweden, Turkey and Ukraine.

Out of around 2,250 events, with the exception of numbers of visitors, the key indicators are collected in the individual countries according to practically identical criteria. The observation of the rules is checked in each case by one or more auditors or other independent organisations. The brochure is published as a pdf file and can be downloaded at www.fkm.de.

The FKM welcomes and supports the endeavours of the UFI - The Global Association of the Exhibition Industry in the implementation of a UFI standard for definitions and auditing of exhibition statistics, in order to secure a uniform basis for exhibition participations worldwide.

Auditor's Certificate

A. Audit commission

The Society for the Voluntary Control of Fair and Exhibition Statistics commissioned us to check whether the statistics reported for the registered events conform to FKM's criteria for certifying trade fair and exhibition statistics. For this commission, also in relation to third parties, our General Terms and Conditions for Auditors and Auditing Companies of 1st January 2002 apply.

B. Object, type and scope of the activity

We have audited events registered for the first time without exception, a selection of recurring events without advance notice according to the to the certfication criteria laid down by FKM. The selection was free of restrictions by the society.

C. Basic legal provisions and documents

The basis for the audit are the Basic rules for certifying trade fair and exhibition statistics of the Society for the Voluntary Control of Fair and Exhibition Statistics (FKM).

D. Result

No objections were raised subsequent to our audit, which was carried out as part of certification by FKM.

Exhibition Space, Exhibitors, Visitors

Space figures

The exhibitor stand space is broken down according to hall space and outdoor exhibition space, as well as according to space booked by domestic or foreign exhibitors. Stands, display panels and demonstrations, which deal with the theme of an event comprehensively or specific aspects of it, independent of exhibitors, are treated as special shows.

Net exhibition space consists of the exhibitor stand space and space for special shows. Gross exhibition space consists of the net space plus the corresponding access and service areas.

Exhibitor figures

Companies or organisations, which offer goods or services from their own separate space, are counted as exhibitors.

Additionally represented firms are such companies whose goods or services are offered by another exhibitor. The number of exhibitors may not include the figures for additionally represented firms.

Visitor figures

The visitor figures are calculated according to the number of entries to the exhibition. The number of entries per day can, on the one hand, be determined by an electronic visitor admission system, whereby a maximum of one entry is registered per day.

Organisers who do not employ admissions monitoring system must supply proof of visitor admission by retaining the ticket counterfoils or through documentation of registrations. The counterfoils of tickets issued by the ticket offices need not be retained as the ticket office takings supply sufficient proof.

FKM Visitors Profile Analyses

The FKM visitors profile analyses are compiled by representative surveys. They provide in-depth information on visitors.

Their compilation follows standard criteria which enables the comparison of visitor statistics between individual events. The questions and types of response have been agreed upon in association with the Trade Fairs' Transparency Working Group of AUMA — Association of the German Trade Fair Industry.

The visitors profile analyses are subject to independent audit in just the same way as the quantitative visitor figures. In as far as structural tests were not carried out for exhibitions of 2011 in the reporting year, the year of the last survey is given behind the title of event.

For the official detailed regulations see the brochure FKM-Certification

For planners who leave nothing to chance.

Reliable exhibition data bears this brand:

Explaining what figures mean in plain language – this is our specialty. Because you can trust exhibitions certified by us: How many visitors were there? What were their occupations? How many visitors made buying decisions? We supply the answers. Promptly. Clearly. Precisely. For around 300 exhibitions in Germany and worldwide.
