Certified Exhibition Data Report 2015

www.fkm.de

The FKM in 2015

Visitor and exhibitor statistics in Germany have been uniformly collected and audited for the past 50 years, starting in early 1966, when the FKM – Society for Voluntary Control of Fair and Exhibition Statistics first began operations. Six trade fair companies had founded the FKM in late 1965 and reached an agreement on standards for determining exhibitor and visitor statistics.

FKM: 50 years of top-quality trade fair data

Twenty-two trade fairs were audited in the first year alone. The German exhibition industry thus set international standards from the start – at the time, France was the only other country in which similar endeavours were being made. The main impetus for this step was that the strong competition between exhibition organisers encouraged "success reports" at numerous trade fairs that were greeted with increasing scepticism by exhibitors. In contrast, the FKM set binding definitions for the most important exhibition figures, which would be examined by an auditor to verify compliance. Its clear objective – then as now – was to build confidence throughout the exhibition community. Today, the FKM has grown to include 52 partners. Its newest member is BUV Market Services GmbH. In 2015, 188 German exhibitions were certified with visitor profile tests for around 80 % of them. Our two international guest members, the Hong Kong Trade Development Council and the Verona Trade Fair Company have had a total of 18 trade fairs certified.

The number of FKM-certified exhibitions declined slightly in 2015, primarily as a result of a comparatively small number of regularly scheduled fairs. However, this has not dampened German organisers' great interest in certification of their exhibitor and visitor statistics.

Every FKM certificate has at its core the basic data on exhibitors, exhibitor stand space and the number of visitor admissions. This data is differentiated according to domestic and international origin. **Visitor analyses for better exhibition planning** FKM's visitor profile analyses – which have been conducted since 1975 – are taking on ever greater importance. That's because this type of analysis makes it possible to pinpoint the groups that can be specifically targeted at exhibitions. Standardised analyses for trade visitors and the general public provide information about each visitor's regional origin, business sector, area of expertise and area of responsibility.

For the exhibition industry, these tests represent a key instrument for use in planning participation as well as in monitoring success. Moreover, this structural data is used as a criterion in making decisions for each exhibition in comparison with other marketing instruments.

Communications for trade fair certification

As part of its communications programme, FKM expanded its FKM knowhow online newsletter in 2015. This newsletter presents information on how FKM information can be used, how to interpret visitor profile data, how exhibition terminology is defined and how the FKM operates. Target groups include not only exhibitors but also consultants, stand construction companies, associations and the media.

In addition, many of our partners refer to the FKM certification on their events' websites and print materials. This has further enhanced the prominence of the "FKM-certified" logo throughout the industry. What is more, the \blacktriangleright www.fkm.de website is scheduled for an anniversary year relaunch.

International Exhibition Transparency

FKM and other European auditing organisations jointly compiled the brochure entitled Euro Fair Statistics, which is published by the Global Association of the Exhibition Industry (UFI). 23 countries have taken part in 2014: Austria, Belgium, Bulgaria, Croatia, Czech Republic, Finland, France, Germany, Hungary, Italy, Luxembourg, Montenegro, Netherlands, Poland, Portugal, Romania, Russia, Slovenia, Spain, Sweden, Switzerland, Turkey and Ukraine.

More than 2,300 events, with the exception of numbers of visitors, the key indicators are collected in the individual countries according to practically identical criteria. The observation of the rules is checked in each case by one or more auditors or other independent organisations. The brochure is published as a pdf file and can be downloaded at \blacktriangleright www.fkm.de.

The FKM welcomes and supports the endeavours of the UFI – The Global Association of the Exhibition Industry in the implementation of a UFI standard for definitions and auditing of exhibition statistics, in order to secure a uniform basis for exhibition participations worldwide.

Auditor's Certificate

A. Audit commission

The Society for the Voluntary Control of Fair and Exhibition Statistics commissioned us to check whether the statistics reported for the registered events conform to FKM's criteria for certifying trade fair and exhibition statistics. For this commission, also in relation to third parties, our General Terms and Conditions for Auditors and Auditing Companies of 1st January 2002 apply.

B. Object, type and scope of the activity

We have audited events registered for the first time without exception, a selection of recurring events without advance notice according to the to the certification criteria laid down by FKM. The selection was free of restrictions by the society.

C. Basic legal provisions and documents

The basis for the audit are the basic rules for certifying trade fair and exhibition statistics of the Society for the Voluntary Control of Fair and Exhibition Statistics (FKM).

D. Result

No objections were raised subsequent to our audit, which was carried out as part of certification by FKM.

Exhibition Space, Exhibitors, Visitors

Space figures

The exhibitor stand space is broken down according to hall space and outdoor exhibition space, as well as according to space booked by domestic or foreign exhibitors. Stands, display panels and demonstrations, which deal with the theme of an event comprehensively or specific aspects of it, independent of exhibitors, are treated as special shows.

Net exhibition space consists of the exhibitor stand space and space for special shows. Gross exhibition space consists of the net space plus the corresponding access and service areas.

Exhibitor figures

Companies or organisations, which offer goods or services from their own separate space, are counted as exhibitors.

Additionally represented firms are such companies whose goods or services are offered by another exhibitor. The number of exhibitors may not include the figures for additionally represented firms.

Visitor figures

The visitor figures are calculated according to the number of entries to the exhibition. The number of entries per day can, on the one hand, be determined by an electronic visitor admission system, whereby a maximum of one entry is registered per day.

Organisers who do not employ admissions monitoring system must supply proof of visitor admission by retaining the ticket counterfoils or through documentation of registrations. The counterfoils of tickets issued by the ticket offices need not be retained as the ticket office takings supply sufficient proof.

FKM Visitors Profile Analyses

The FKM visitors profile analyses are compiled by representative surveys. They provide in-depth information on visitors.

Their compilation follows standard criteria which enables the comparison of visitor statistics between individual events. The questions and types of response have been agreed upon in association with the Trade Fairs' Transparency Working Group of AUMA – Association of the German Trade Fair Industry.

The visitors profile analyses are subject to independent audit in just the same way as the quantitative visitor figures. In as far as structural analysis were not carried out for exhibitions of 2015 in the reporting year, the year of the last survey is given behind the title of event.
